<i>60cm wide elements</i>	
75cm (pair)* long	130w
150cm	125w
220cm	185w
235cm	195w
290cm	245w
315cm	265w
350cm	295w
420cm	355w
* two elements of 60 x 75cm can be installed side by side or one in front of the other, but both MUST be installed in series.	

Elements must not be folded, bent or cut – they must be installed flat and fixed to the underside of the joist along the fixing strips. The elements are self-fusing, should an element be damaged, the others in that circuit will continue to work. We would not recommend replacing selective element in a circuit for installations more than 10 years old.
